Will Kazakhstan gain market share in battery materials?

The country wants to gain market share in battery materials such as lithium, cobalt, manganese, nickel and graphite amid rising demand for the materials, Sharlapaev said. Kazakhstan already mines manganese, but last year it launched processing of manganese sulphate and aims to eventually capture 10% of the global market for the battery material.

Does Kazakhstan mine manganese sulphate?

Kazakhstan already mines manganese, but last year it launched processing of manganese sulphate and aims to eventually capture 10% of the global market for the battery material. It also supplies phosphates for fertilisers and aims to process material needed for LFP (lithium ferro phosphate) batteries that are growing in popularity, he added.

How many mining licences have been issued in Kazakhstan this year?

This has hiked the number of issued licences so far this year to 487 compared to 397 for all of 2023, according to data from the ministry.
