What is a lithium-ion battery charging Safety Cabinet?

Justrite's Lithium-Ion battery Charging Safety Cabinet is engineered to charge and store lithium batteries safely. Made with a proprietary 9-layer ChargeGuard(TM) system that helps minimize potential losses from fire, smoke, and explosions caused by Lithium batteries. [Shop Now](#)

Why should you use a lithium ion battery charging and storage cabinet?

Safely managing the charging and storage of lithium-ion batteries in the workplace is crucial to prevent accidents and ensure the well-being of employees. The new Justrite lithium ion battery charging and storage cabinet provides the ideal storage solution.

How does the batteryguard cabinet work?

The Batteryguard cabinet is also safe and easy to use for new personnel. It's simple: when you need to charge up your battery, you just open the cabinet and place the battery on the charger. Because the charger cables are fixed in the cabinet, you can be sure that you are always using an original charger for the battery.

How many batteries can a batteryguard cabinet hold?

Whether you have a great many batteries or just a few, large or small, the Batteryguard cabinet offers a solution for every situation. We offer compact models that charge 2 to 10 batteries and a spacious double-door safe where you can store up to 20 batteries.

What are Justrite Li-ion battery charging and temporary storage cabinets?

The new Justrite li-ion battery charging and temporary storage cabinets were designed to reduce the risks of battery fires and thermal runaway.

Why do I need to close the cabinet doors if a battery catches fire?

Because the charger cables are fixed in the cabinet, you can be sure that you are always using an original charger for the battery. It is important that you always close the cabinet doors, because if a battery catches fire, that fire is kept inside.
