

Battery sound quality ranking

What is a good rating for a Bluetooth speaker?

IPX7 or IP67 ratings offer good protection against water and dust. Connectivity Options: While Bluetooth is standard, some speakers offer additional connection options like Wi-Fi, NFC pairing, or a 3.5mm auxiliary input. Consider which options are important for your setup.

Do small speakers affect battery life?

Smaller-sized speakers usually have a smaller driver and (most of the time) a degradation in sound quality. Bonus features will also take a hit in lightweight, portable speakers as there is less room in a smaller chassis to store extra functionality. Finally, size usually has a big impact on battery life.

What does kbps mean on a Bluetooth speaker?

Represented is the max transfer rate (kbps) of each respective Bluetooth codec (greater is better). Each waveform depicts a transfer rate of 100 kbps. Just like wireless headphones, Bluetooth speakers support specific Bluetooth codecs.
