Which countries produce the most EV batteries in 2023?

Production in Europe and the United States reached 110 GWh and 70 GWh of EV batteries in 2023, and 2.5 million and 1.2 million EVs, respectively. In Europe, the largest battery producers are Poland, which accounted for about 60% of all EV batteries produced in the region in 2023, and Hungary (almost 30%).

Which country produces the most EV batteries in Europe?

Germany leads the production of EVs in Europe and accounted for nearly 50% of European EV production in 2023, followed by France and Spain (with just under 10% each). Battery production in China is more integrated than in the United States or Europe, given China's leading role in upstream stages of the supply chain.

Who is leading the electric vehicle battery market in 2023?

In February 2023, the company's dominant position in the electric vehicle (EV) battery market was cemented by a report from SNE Research--a South Korean firm, which highlighted Contemporary Amperex Technology Limited's (CATL's) growth to 191.6 GWh produced in 2022. CATL has reigned supreme for a number of years with a market share of 34% in 2022.

Are Asia's top battery players a global leader in the EV supply chain?

Asia's top battery players have taken a lot of risks to be global leaders in the EV supply chain. They've built up capacity for a market that has not yet fully arrived. To keep their lead, they now need to shift more investments abroad, even with oversupply in some home markets.

Why are Asian companies investing in EV battery supply chains?

Asian companies have invested heavily to gain global dominance in electric vehicle (EV) supply chains. To keep their lead, many EV battery suppliers are increasingly investing abroad. Leading players with strong global partnerships will stay on top amid this industry shift. Some weaker ones in China may not survive.

Which battery maker has the most competitive EV product?

Still, the top three battery makers are responsible for two thirds (66%) of the total battery deployment, which highlights the importance of scale in this business, in order to have the most competitive product on the market. Panasonic, once upon a time a leader in the automotive EV business, has continued its slow slide down the table.
