

Buffer battery location

Where is the buffer battery compartment located?

The buffer battery compartment is located behind the screw cover in the lower left-hand corner of the operating panel. When exchanging the batteries, special care should be taken that the polarity is correct (POS-pole of battery outwards). The battery needs to have IEC designation "LR 6"; and must be of the leak-proof type.

What happens if a buffer battery is lost?

With discharged (or missing) buffer batteries, the memory for the machine parameters and for the user-program will be supported only as long as the mains remains switched on. Continued operation is still possible but the memory contents will become erased in the event of a mains failure. Please note that the TNC has to be

Where is aux battery located?

Aux battery is located under the dash. 1. To get it out open drivers door 2. Remove underside dash panel 3. Remove end panel of dash (door closes against it) 4. You will see a bolt about in the center of the end panel . Remove it. 5. From underside of dash remove battery holder. 6. Remove battery from holder and replace with new one.

This video will help you locate the auxiliary battery in a 2016 Mercedes E350 Wagon 4matic car. I researched extensively online but didn't find the answer...
