

# China-Africa Battery Factory

Who is investing in Africa's first electric vehicle battery factory?

The largest among them is Chinese-German battery-maker Gotion High-Tech, which signed a deal with Morocco last year for \$6.4 billion investment to construct Africa's first electric vehicle battery factory. Investments also include Youshan, a joint venture backed by Korean giant LG Chem and China's Huayou Cobalt.

Are China's battery projects based on US trade ties with Morocco?

The Chinese battery projects include at least three joint ventures and several that reference Morocco's trade ties with the United States. The largest among them is Chinese-German battery-maker Gotion High-Tech, which signed a deal with Morocco last year for \$6.4 billion investment to construct Africa's first electric vehicle battery factory.

Why are Chinese batteries moving to the US?

By moving operations to U.S. trading partners like Morocco, Chinese players that have long dominated the battery supply chain are seeking a pathway to cash in on increasing demand from American carmakers like Tesla and General Motors, said Kevin Shang, a senior battery analyst at the consulting firm Wood Mackenzie.

Does Morocco have a battery boom?

But few countries have seen the kind of boom that Morocco has. At least eight Chinese battery makers have announced new investments in the North African kingdom since President Joe Biden signed the Inflation Reduction Act, the \$430 billion U.S. law designed to fight climate change, according to an Associated Press tally.

based on the expected adoption of battery-swap vs. battery charge technology (~2.6-3.1 GWh of battery demand in 2030) Conservative scenario: 50% adoption of battery SWAP and 50% ...
