The new 12 year warranty covers: In a nutshell, the warranty covers any GivEnergy residential battery storage system installed from 11/09/2023 - no matter which specific battery and inverter model are fitted.

How long does a battery warranty last?

If your battery has a defect or mechanical issue, if it breaks, or experiences unreasonable wear and tear, that's where your product warranty comes into play. Nowadays, most manufacturers offer at least 10 years of coverage under a product warranty, while some premium options have up to 20 years of protection against product defects.

What is a solar battery warranty?

Solar battery warranties vary by manufacturer and product. A standard battery warranty should come with at least 10 years of protection, though it can be shorter depending on how often you charge and drain your battery.

Does a battery storage system need a warranty?

A battery storage system is a decades-long investment that a warranty can help protect. The less power your system stores, the more your home may need to draw from the utility company, which eats into your savings. A good warranty ensures that if your battery experiences a problem, that it will be replaced and your investment will be protected.

How does a battery warranty work?

Battery companies with outstanding warranties may cover these costs entirely or up to a certain amount of time or a certain travel distance (i.e., three hours of driving). Some manufacturers will pay for these costs by providing the company that performs the repair a rebate or check rather than reimbursing you directly.
