

Factory solar power subsidies

Will a UK solar farm be built without government subsidy?

The solar farm will be the first in the UK to be built and operated without Government subsidy, following a fall in the cost of solar panels by two thirds since 2010. To date the industry has successfully installed 12GW of solar capacity across the country.

Will a subsidy-free solar site be built in Clayhill?

The Government expects to see more developers install and connect subsidy-free sites later this year. For the solar industry, Clayhill is a landmark development and paves the way for a sustainable future, where subsidies are no longer needed or relied upon.

Where can I get a grant for solar energy?

Local Authority Grants and Initiatives: Various local councils across the UK offer grants or incentives for residents and local businesses to adopt solar energy. These grants are often part of broader initiatives aimed at increasing energy efficiency within the community.

How can government support solar panels in the UK?

While the landscape of government support for solar panel installations has evolved with several past programs phasing out, there are still viable options available to assist UK households in adopting solar energy. Key among these are the Energy Company Obligation (ECO4), Local Authority (LA) programs and the Home Upgrade Grant (HUG).

When will the UK's first subsidy-free solar farm open?

The UK's first subsidy-free solar farm will be officially opened today (Tuesday 26 September) by Climate Change Minister Claire Perry. This was published under the 2016 to 2019 May Conservative government
