

French battery sucker

Is TotalEnergies the biggest battery storage project in France?

The energy major has 103MW of capacity market contracted energy storage online or coming online in France. Interestingly however, despite presiding over the single biggest project in the country, TotalEnergies sits second in Clean Horizon's chart of France's most prolific (publicly announced) battery storage project owners and developers.

Will 900MW of battery storage be online in France?

Image: TotalEnergies. Close to 900MW of publicly announced battery storage projects will be online in continental France by the end of next year and although the country lags behind its nearest northern neighbour, the business case for battery storage is growing.

Where is France's largest battery energy storage system located?

reported a while back on the completion of an expansion at continental France's largest battery energy storage system (BESS) project. BESS capacity at the TotalEnergies refinery site in Dunkirk, northern France, is now 61MW/61MWh over two phases, with the most recent 36MW/36MWh addition completed shortly before the end of 2021

How fast is battery storage deployment in France?

Battery storage deployment has not been as fast in France, or indeed much of mainland Europe, as it has been in markets like the US, UK and latterly Australia. RTE is conducting a pilot project, called Project RINGO, which will see just under 100MWh of battery storage deployed across three French sites that act as virtual transmission assets.

Is the battery industry a real challenge in France?

The structuring of an innovative and competitive industry covering the entire battery value chain is a real challenge, and one to which the French government and a number of companies are fully committed. **BROWSE THIS DIRECTORY AND FIND YOUR MATCH !**

Is France a good place to invest in battery storage assets?

This is all the more encouraging because unlike the UK, there are only two revenue streams available for battery storage assets in France today. The other is frequency control reserve (FCR), aka primary control reserve (PCR), what could be seen as the first rung of the ancillary services ladder.
