

Magnetic Sheet Capacitor Equipment

What is a magsys magnetizer?

MAGSYS magnetizers allow the magnetization, adjustment and also the demagnetization of isotropic and anisotropic magnetic materials of different sizes. In particular, all highly coercive magnetic materials, such as Sm 2 Co 17 or plastic-bonded NdFeB magnets, can be magnetized easily and with short cycle times.

What types of magnetizing equipment are available?

Our products include magnetizers, magnetizing fixtures, gaussmeters, fluxmeters, and Helmholtz coils, as well as other magnetics equipment. Our magnetizing equipment is extremely versatile and uses patented ECS technology, which allows the user to switch capacitance electronically.

How do you use a sheet magnetizer?

For use with any size sheet up to 30 mils thick. Just roll the magnetization roller over the sheet (a slow and steady pace of approximately 10-12 feet per minute) and your sheet will be magnetized. Results in 16 pole per inch magnetization pattern. Buy the Handheld Sheet Magnetizer Online

What types of magnets can a standard magnetizer saturate?

Our standard magnetizers, when used with proper fixturing, are capable of saturating virtually all sizes and configurations of permanent magnet assemblies, including: PM motors, loudspeakers, linear actuators, magnetrons, TWT magnets, torque motors, and relays.

What is magnetizing equipment?

Our magnetizing equipment is extremely versatile and uses patented ECS technology, which allows the user to switch capacitance electronically. All magnetizing fixtures are designed specifically for the user's application and part. Featured Items: Capable of magnetizing neodymium, samarium-cobalt and ferrite magnet parts. NEW! Model 412B Magnetizer

Which magnetic materials can be magnetized?

In particular, all highly coercive magnetic materials, such as Sm 2 Co 17 or plastic-bonded NdFeB magnets, can be magnetized easily and with short cycle times. In addition to raw magnets, e.g. directly after production, complete workpieces with magnets already installed can also be magnetized.

Non-magnetic products are very important for applications that generate a magnetic field, and for equipment operating in this sensitive environment. For example, magnetic capacitors can be ...

Most of the above trimmer capacitors can be ordered as non-magnetic - see non-magnetic section. § Voltmatics (omACrARMs son NON-Rename :Homkrcukkimm MOVEAEK ninkon: ...

Bunting Magnetics Europe manufactures and supplies a range of commercial magnet chargers for the

magnetisation of all types of permanent magnets and/or assemblies. They utilise oil filled ...

MAGSYS magnetizers allow the magnetization, adjustment and also the demagnetization of isotropic and anisotropic magnetic materials of different sizes. In particular, all highly coercive ...

Magnetising equipment | Our range falls into four main categories, read here to find out more or for further information call us today.

The pulse measuring instruments in the MAG series operate on the principle of capacitor discharge. The instruments enable the magnetization, adjustment, and also the discharging of all anisotropic and isotropic magnetic materials in all ...

MSS boasts a range of capacitor discharge machines and copper coils. This allows us to customise the magnetic field to the precise level required for a given size of a specific material. ...

The magnetic coupling resonant wireless power transfer (MCR-WPT) system is considered to be the most promising wireless power transfer (WPT) method because of its ...

Multilayer Ceramic Capacitors are made from extremely pure, fine and uniform synthesized materials. The capacitors have several significant attributes, such as high capacitance values in small sizes and excellent high frequency ...

Oersted Technology produces an innovative line of magnetics equipment and instruments for use in manufacturing, research, and development applications. Our products include magnetizers, magnetizing fixtures, gaussmeters, ...

The magnet setters utilise capacitor discharge technology to generate either a pulsed magnetising or demagnetising field inside the fixture bore. In the "Mag" mode, the machine will deliver the full charge to the magnetising fixture, while ...

Bunting Magnetics Europe manufactures and supplies a range of commercial magnet chargers ...

We manufacture the highest-quality flexible composite magnetic sheets, strips, tape and extrusions. Ideal applications for our flexible-magnet products include RFI/EMI shielding, lead ...

Surface Mount Multilayer Ceramic Chip Capacitors for Non-Magnetic Applications (Epoxy Bonding)
FEATURES o Manufactured with non-magnetic materials o Safety screened for ...

The pulse measuring instruments in the MAG series operate on the principle of capacitor discharge. The instruments enable the magnetization, adjustment, and also the discharging of ...

Magnetic Sheet Capacitor Equipment

MAGSYS magnetizers allow the magnetization, adjustment and also the demagnetization of isotropic and anisotropic magnetic materials of different sizes. In particular, all highly coercive magnetic materials, such as Sm 2 Co 17 or ...
