

Outdoor courtyard solar power supply split type and integrated type

How much does a split solar street light cost?

The split solar street light installation process is more complex since it demands more planning than all-in-one designs. In split systems, each component must be purchased and installed separately. So, the overall all-in-one solar LED street light price, even for a low-power option, can increase by 30-40%, starting from at least \$60-70.

What is a split-type solar street light?

A typical split-type solar street light has a post top photovoltaic module and arm mounted luminaire. The battery system, depending on the type of its battery chemistry, is either integrated into the luminaire assembly/photovoltaic module or designed as an individual assembly for underground burial, on-pole attachment or base mount.
