

Outdoor solar powered controller reset

How do I perform a soft reset on my solar charge controller?

Follow these steps to perform a soft reset: Step 1: Turn off the solar charge controller: Locate the power switch or disconnect the controller from the battery and solar panel. Step 2: Disconnect external power sources: If your solar charge controller is connected to other devices or systems, disconnect them to isolate the controller.

How do I Reset my solar controller?

To perform a soft reset: Press all four buttons on the front of the controller. Hold for 15 seconds until you see the controller resetting. If this does not work, try a hard reset. To perform a hard reset: Take the solar controller off the wall. Wait 15 to 20 minutes. Reconnect the battery positive and negative wires first.

Can a solar charge controller be reset without disconnecting?

No, when you want to reset the MPPT charge controller or do a hard reset, you disconnect the solar panels and cut the power. Yes, when you want to reset the PWM charge controller and do a soft reset, you leave disconnecting. What is the voltage setting for the solar charge controller?

How do I Reset my solar panel?

Disconnect the solar panel connections. Disconnect the battery. Wait for around five minutes for the system to shut down completely. Now, reconnect the battery, and then the solar panels to the solar charge controller.

What does resetting a solar controller mean?

Resetting your solar controller means you are returning the controller back to its factory settings. Resetting the entire system may help fix issues with the controller if your other troubleshooting methods have not worked. You should perform a reset at night time or, if doing the reset during daylight hours, cover up your solar panels for safety.

When should I Reset my solar controller?

Any kind of reset on your solar controller should be performed under supervision when your solar panels are using the least amount of power, to avoid unintentional damage to the system, e.g. at night. Depending on what type of solar controller you have -- whether it be a PWM or MPPT system -- the instructions for the reset may differ greatly.
