

## Power adapter does not light up without battery installed

What if my AC power adapter is not working?

“The AC power adapter wattage and type cannot be determined. The battery may not charge. The system will adjust the performance to match the power available. Please connect a Dell 65 W adapter or greater for the best system performance. Strike the F3 key (before F1 or F2 key) if you do not want to see power warning message again.

Does leaving AC adapter plugged in overnight increase battery charge?

The battery icon at the bottom of the screen does not recognize that the AC adapter is connected. When I click on that icon to see the expanded display of battery condition it does not recognize that the AC adapter is connected. (7) Leaving the AC adapter plugged in overnight does not increase the charge level of the battery as shown in Windows.

How do I Fix my laptop battery not charging?

Shut down your laptop and disconnect the battery. Connect the AC Adapter then open your laptop. Close your laptop again and connect the battery while the AC Adapter is still plugged in. It worked for me and now is charging again. I will come back with a edit if it stops working again and then i will send it to warranty.

What does a power/charge led on a noptebok mean?

Power/charge LED lit means that the power adapter and charging subsystem is OK. A new battery or power adapter will not resolve that. The notebook needs to be opened up and inspected by someone familiar with the electronic subsystems of the noptebok. I am a volunteer forum member.

Does a laptop work with a battery adapter?

The laptop works with the adapter and with the battery, the only problem is the adapter won't charge the battery. Both the battery and adapter are working fine. My brother has the same laptop, and I charged my battery with my adapter on his laptop and it charged normally. I have done a BIOS update and tried the steps outlined here.

Why does my laptop light up when charging?

It could be something as simple as the DC power connector on the notebook is damaged or a component of the power/charge subsystem has failed. (MOSFET/Capacitor/resistor) Power/charge LED lit means that the power adapter and charging subsystem is OK. A new battery or power adapter will not resolve that.
