

How much money will Romania get for battery storage projects?

The financial support in the form of direct grants was announced by the government in November 2022, reported by Energy-Storage.news at the time, and will go towards at least 616MWh of battery storage projects. The European Commission has approved a EUR103 million state aid scheme from the government in Romania for battery storage projects.

What is the European Commission's recommendation on energy storage'?

It contains concrete recommendations to help facilitate the fast and broad deployment of energy storage. In its latest effort to support the deployment of energy storage in Europe, the European Commission adopted its "Recommendation on Energy Storage - Underpinning a decarbonised and secure EU energy system," on March 14, 2023.

Will a solar project help the battery storage market?

A solar project from developer Econergy in Romania. The country's solar sector is set to grow substantially, which will help the battery storage market kick on. Image: Econergy. The European Commission has approved a EUR103 million (US\$125 million) package of direct grants from the government in Romania for battery storage projects.

What is the 'recommendation on energy storage'?

The "Recommendation on Energy Storage" was released in the same week as the Electricity Market Design (EMD) reform, and the Net Zero Industry Act (NZIA). The EMD proposes tools to reduce short-term electricity market price fluctuations. It also recommends measures that could make the market better suited to deploy (variable) renewable generation.

Which non-lithium energy storage companies did a weak 3rd quarter results?

Eos, ESS Tech Inc and Energy Vault, the three big-name non-lithium energy storage firms that listed via SPAC deals, saw weak third quarter results. The US battery storage system integrator arm of Korean battery manufacturer LG Energy Solution (LG ES) has signed a 4-year supply deal with developer Terra-Gen.

Does Wärtsilä's battery storage system resemble real-life 'worst-case scenario' conditions?

Wärtsilä has carried out more large-scale fire tests on its battery storage units, which the system integrator claimed closely resemble real-life 'worst-case scenario' conditions. Editor Andy Colthorpe speaks with Long Duration Energy Storage Council director of markets and technology Gabriel Murtagh.

24 grid-connected projects commissioned by end Q3 2024. African Energy Live Data's latest analysis shows that almost 2.4GW of on-grid generation capacity was ...
