Will European solar panels be able to trade with China?

European solar panel manufacturers have previously asked the EU to consider trade safeguards on Chinese imports, but Brussels and governments including Germany have warned broad curbs on Chinese supply could stunt Europe's fast expansion of clean energy.

Are Chinese solar companies coping with a trade dispute?

Chinese solar companies are capable of mitigating risks while maintaining their competitive edge in the international market amid an ongoing trade dispute, as they have been stepping up efforts to diversify their global operations in recent years, experts and business insiders said.

How did China control the global solar market?

The increased installed capacity, the heavy manufacturing, and the availability of materials on its domestic land allowed China to control the global solar market by imposing quotas and restrictions on importing countries. We have shown that China alone installed more than 50 % of the total Asian solar capacity in the span of 25 years.

Will European countries help Europe's ailing solar panel manufacturers?

REUTERS/Stephane Mahe/File Photo Purchase Licensing Rights BRUSSELS, April 15 (Reuters) - Most European Union countries are set to commit more support to help Europe's ailing solar panel manufacturers on Monday, but steer clear of restrictions on cheap panel imports from China, a draft document showed.

Why do Chinese companies invest in solar panels?

The Chinese companies supply around 200 countries' needs of solar PVs, besides their domestic demand. Furthermore, to level up the competition, China invests in South Asian neighboring countries' solar projects. Investments in Vietnam, Malaysia, and other countries, made them worthy opponents able to supply the rest of the world as well.

Is Europe playing catch up with China's solar industry?

With some Chinese solar firms able to sell even below production costs, Europe is playing catch up. "The solar industry in China has been strategically subsidised with hundreds of billions of dollars for years," Erfurt told Reuters. (\$1 = 0.9310 euros)
