

Solar panels can be obtained cheaply

Should you buy cheap solar panels?

Opt for cheap solar panels if you have a tight budget and your household energy consumption is relatively low. Solar panels for homes have become a symbol of eco-conscious living, but the initial cost can be a real hurdle. Yet the good news is that cheap solar panels are a reality for homeowners.

Where can I find cheap solar panels?

Websites like Trustpilot have lots of reviews that can help you make up your mind. Finding cheap solar panels that go the distance is a bit like trying to find a bargain bucket of caviar at Lidl - you've got to have your wits about you. But rest easy, because we've got you covered.

Is the cost of solar panels affordable in the UK?

Solar energy has emerged as a cost-effective and sustainable solution for powering homes and businesses in the UK in recent years. The availability of affordable solar panels in the UK has grown as the demand for renewable energy increases.

Why are cheap solar panels so expensive?

The overall construction of cheap solar panels is poor. This includes the use of low-grade ethylene vinyl acetate (EVA) which degrades over time and results in lower energy production. Also, the back of the cheapest solar panels is often made from Tedlar (polyvinyl fluoride film trademark), which is prone to degradation and deterioration.

What is the cost of a 3.5 kWp solar PV system?

The average cost of a 3.5 kWp solar PV system, suitable for an average three-bedroom house, should be around £7,026. That's because cheaper panels often have issues that mean they don't work as well or last as long as more expensive panels and may require more maintenance.

What are the cheapest types of solar panels?

Polycrystalline solar panels and thin-film solar panels are the least expensive types of solar panels, typically costing around 20% less than monocrystalline panels. However, they are also less efficient.
