

Solar photovoltaic panels leaking rain

Can solar panels cause a roof to leak?

The installation of solar panels on your roof can be an exciting time as it means you will be cutting down your energy costs considerably, but doing this will involve drilling holes in your roof, which could beg the question of whether this will cause your roof to leak? There are various reasons your roof could leak after installing solar panels.

Can solar panels protect your roof from water leaks?

While solar panels can protect your roofs, if you install the solar panels when the roofs are in bad shape, you would end up in more trouble. While the panels won't protect the roof from the leak, it would be tough for you to revamp your roof after installing the solar panels. How to identify and fix the solar water leaks on the roof?

How do I fix a roof leak after installing solar panels?

If you're experiencing roof leaks after installing solar panels, contact a professional roofing contractor who specializes in solar panel installations for a thorough inspection. They can identify the source of the leaks and recommend appropriate solutions.

Can solar panels damage a roof?

Yes. Though poor installation can damage your roof, a properly installed one can protect your roof from the harsh climate. Too much sun and rain could damage your roof and increase the likelihood of a leak, and your solar arrays may protect your roof from wear and tear.
