

# The Ministry of Industry and Information Technology talks with battery companies about issues

Should lithium-ion battery companies reduce production costs?

The Ministry of Industry and Information Technology unveiled a draft guideline on Wednesday that will guide lithium-ion battery companies to reduce projects that aim solely to expand production capacity. Instead, lithium-ion battery companies will be encouraged to strengthen technological innovation, improve quality and reduce production costs.

What's new in China's Lithium-ion battery industry?

China's Ministry of Industry and Information Technology in June finalised revised guidelines for the country's lithium-ion battery industry, which set higher standards for energy intensity, power density, cycle life and other battery specifications.

What will China's new lithium-ion battery regulation mean for the battery industry?

China's industrial regulator plans to launch a major document to guide the production capacity of lithium-ion batteries, which industry experts said will knock out a batch of low-end battery cells and accelerate the structural adjustment of the country's booming lithium-ion battery sector.

Will China improve its power battery industry management policies?

China will continue optimizing its power battery industry management policies to further facilitate the rapid development of the sector, said a government official on Friday.

Is there a 'structural excess' in the lithium-ion battery sector?

Mo Ke, founder and president of market consultancy RealLi, said there is some "structural excess" in the lithium-ion battery sector, with insufficient high-quality production capacity but excess low-end production capacity.

What will China's Lithium-ion battery production capacity be in 2025?

The China Automotive Power Battery Industry Innovation Alliance predicted that by 2025, the country's lithium-ion battery production capacity will likely exceed 3,000 GWh. However, the capacity utilization rate of the country's lithium-ion battery industry dropped to about 40 percent last year and is likely to reach 35 percent by 2025.

China issued draft rules on Wednesday to regulate its lithium battery market, after rapid expansion in the sector hit industry profits and sparked concerns about overcapacity in ...
