Should you keep batteries in the original packaging?

Don't! Keeping batteries in their original packaging until you need them protects them from environmental factors like humidity. Keeping the packaging also keeps it from the rubbish bin and gives you an ideal way to store batteries at home over winter when they aren't needed.

Can you store different types of batteries together?

If you are not using a storage container like the Battery Daddy that separates each battery, storing different types of batteries together, like mixing lithium and alkaline, can lead to poor performance or even leakage. It's best to store batteries by type and label your storage container so you don't accidentally mix them.

How do you store a rechargeable battery?

Alkaline batteries can be stored in moderately humid conditions (35 to 65% relative humidity). All other batteries prefer a drier environment, additionally don't store batteries on the ground, as this can encourage condensation too. Some rechargeable batteries will permanently damage themselves if kept in a discharged state.

Can you store a battery in a plastic bag?

As easy as it may be to have a dedicated "battery drawer" or to store loose batteries in a plastic zipper bag together, it's not a great idea. Batteries can easily come into contact with each other, which can cause a short circuit, or at the very least cause them to discharge and become drained.

Do household batteries need to be stored properly?

Household batteries, like alkaline and lithium types, are essential for powering everyday devices, from TV remotes to flashlights. However, proper storage is key to ensuring their longevity and safety. Improper storage can lead to battery leakage, reduced lifespan, or even hazardous situations.

How do you store a coin battery?

This is especially likely if a mixture of different sized and shaped batteries are stored in the same bag, with coin batteries easily becoming stacked or sandwiched between the poles of other batteries by mistake. The best option for loose batteries is to store them in a way that allows them to lay side-by-side.
