

Where to put the spare battery

How do you replace a car battery?

Reconnect terminals, attaching positive (+) first, then negative (-), and tighten. Start the car to check installation and ensure the new battery is functioning. Dispose of the old battery safely at a recycling centre, or specialised waste disposal. As with any device, batteries have a lifespan and will eventually stop working.

How do you find a car battery?

Locate the battery. Look for the battery in one corner of the engine bay, either near the windshield or the front bumper on either side of the car. Find the rectangular battery box which has 2 cables attached to it. If you have a newer car, the battery might be underneath a plastic cover, so remove the cover if necessary.

How do you reattach a car battery?

Re-attach the battery-securing clamp, tighten the securing bolt, remove the rags from the battery terminals and reattach them, connecting the +ve one first. Check the terminals are tight, re-attach the covers and you're good to go. Remember you may have to reset your car's stereo, clock etc. Take the battery to the tip to dispose of it safely.

How do I replace a car battery retaining bracket?

The battery retaining bracket can now be replaced using the nuts that you kept safe earlier. The old battery must be disposed of in a responsible manner - it cannot be put in with your household waste. Garages, scrap metal collectors and recycling centres, such as your local tip, will accept your old car battery.

How do you put a battery in a car battery bay?

Position the battery inside the bay and remove the plastic caps that are on top of the terminals. The positive terminal must be connected first. Push the positive red lead into the battery terminal that's marked with a plus symbol. Then secure the nut into position and tighten it using your spanner.

How do you reconnect a car battery?

To reconnect a car battery, position the new battery in the engine battery tray; re-connect the positive terminal; connect the negative terminal; check the connections; and then start the engine. Service, repair or MOT?
