What are capital allowances on solar panels?

Capital allowances on solar panels are tax deductions that businesses can claim on the cost of installing solar panels in commercial properties. The UK government offers tax relief in the form of capital allowances to encourage businesses to invest in renewable energy and reduce their carbon footprint.

Are solar panels tax deductible?

Overall, capital allowances on solar panels can provide a valuable tax relief for businesses investing in renewable energy and can help to reduce the cost of transitioning to a more sustainable and energy-efficient business model. The Government is offering tax breaks for the installation of solar panels until 31 March 2023.

Do you need planning permission to install solar panels?

Current rules that require businesses to apply for planning permission if solar panels will generate more than one megawatt of electricity will also be scrapped, meaning organisations will be able to install more solar panels on rooftops without the delay and cost of applying for planning permission.

Can a business claim a 100% first-year capital allowance on solar panels?

Under the current rules, businesses can claim a 100% first-year capital allowance on the cost of purchasing and installing solar panels, meaning that the entire cost of the investment can be deducted from taxable profits in the first year.

Are there government grants for solar panels?

There are no government grants specifically for solar panels, but are more steered towards improving energy efficiency. All is not lost, though, as some grants can be used to install them as part of energy efficient upgrades.

Are solar panels a special rate expenditure?

With effect from 1 April 2012 for corporation tax and 6 April 2012 for income tax, all capital expenditure on the provision of solar panels is specifically designated as special rate. The reason for designating solar panel expenditure as special rate expenditure was to ensure clarity of treatment.
