

Zimbabwe Energy Storage Government Subsidy Policy

Who oversees the energy sector in Zimbabwe?

The energy sector in Zimbabwe is overseen by the Ministry of Energy and Power Development (MoEPD). The National Energy Policy (NEP) was promulgated in the year 2012 to provide an overall framework for optimal supply and utilization of energy in general and ensure access to modern energy services for the country's socio-economic development.

What is Zimbabwe's energy policy?

All of these are clearly defined in this policy. Zimbabwe at present is mainly dependent on coal, petroleum, hydroelectric power and fuel-wood to meet its energy needs. The country is dependent on petroleum and power imports due to lack of petroleum resources and ageing electricity system infrastructure.

What are the energy supply options in Zimbabwe?

Zimbabwe's energy supply options include hydroelectricity, coal, and renewable sources. The grid in Zimbabwe is well developed, with efforts after 1980 extending supplies to rural business and government administrative areas.

What is the electricity rate in Zimbabwe?

SECRETARY FOR ENERGY AND POWER DEVELOPMENT. Zimbabwe currently has a national electrification rate of 42%. While electricity has reached 83% of the urban households, rural electrification is still around 13% as per the National Energy Policy of 2012.
